

OneAI

UNIFIED ENTERPRISE AI

One AI platform for your entire company. On your servers — or isolated on ours.

- Centralized dashboard
- One budget for everyone
- Latest models on release
- On-prem, or isolated hosting

01 — CONTROL

Data stays with you

Installed on your servers — we maintain it. Or an isolated instance on our servers, never shared with another company.
ZDR: data is not stored for model training.

02 — BUDGET

One invoice for all

Pay once per month for every employee. No individual AI stipends that are hard to track or reconcile.

03 — CAPACITY

Latest models, fast

Access current AI models as they launch — OpenAI, Anthropic, DeepSeek, and more. Admins choose which models each team can use.

WHAT YOUR TEAM CAN DO

Read & create office files

DOCX, PPTX, XLSX, and PDF from AI commandsAI writes and executes code for complex tasks.

Write & run code

Browse the web

Search for up-to-date information.

Shared knowledge

Answers from your company documents.

Speech to text

Voice into meeting notes and documentation.

Text to speech

Natural speech for audio and assistants.

PLAN · UP TO 40 USERS

Rp12.400.000 / month

Billed quarterly · Rp37.200.000 · Save 10% annually

On-prem install (we maintain it) or isolated managed server. USD 300 AI credit, 1x onboarding, monthly reports. Custom SSO scoped separately.

COMPARE

Individual AI stipends usually fail

- Usage cannot be verified
- Funds may not be spent on AI
- Extra admin overhead, higher cost
- No centralized control
- Data leaves on 40 personal accounts

ChatGPT seats cost less for small teams. Choose OneAI for control, multiple models, one budget across providers, and data that stays with you.

NOT FOR YOU IF

Fewer than 20 people with chat-only needs

ChatGPT Plus or Business is usually enough and cheaper. OneAI is not meant to replace personal subscriptions at that scale.

GOOD FIT IF

20–40 people who need one platform

Rp12,400,000 for up to 40 users, including USD 300 credit across providers, with on-prem or isolated hosting and multi-model access. Prices at 40 annual ChatGPT seats are close.

COST AND CAPABILITY COMPARISON · PER MONTH

	Individual stipends	ChatGPT Business	OneAI
20 users	Rp10,000,000	Rp8.0M / Rp6.4M yr	Rp12,400,000
40 users	Rp20,000,000	Rp16.0M / Rp12.8M yr	Rp12,400,000 · fixed
Usage across providers	No	Included in ChatGPT	USD 300 pool
Single invoice & reports	No	ChatGPT only	Yes · all models
Admin chooses models	No	OpenAI only	Yes · all vendors
Multi-model	Depends	OpenAI only	Yes
Zero Data Retention	No	No training · not ZDR	Yes
On-prem or isolated host	No	Vendor cloud	Yes
Knowledge, files, code	No	Yes · ChatGPT	Yes · all models

Assumptions: Rp16,000/USD. Stipend example Rp500,000/person. ChatGPT Business \$25/user monthly or \$20/user annually. USD 300 = Rp4,800,000. ChatGPT includes model usage; extra credits are optional. Competitor prices may change; not their quotes.

Stipends often don't become AI

Money in employee accounts can be spent on anything. No reporting, no audit, no policy.

Seat price is not the product

At 40 seats ChatGPT is ~Rp16M monthly or ~Rp12.8M annually. OneAI stays at Rp12.4M. Prices are close; buy the platform.

ChatGPT already has files and code

Knowledge, files, code, and admin controls are in ChatGPT Business. OneAI adds multi-model, on-prem, and one budget across vendors.
